

Project Demo Planning

This document details the preparation checklist, environment setup, fallback plan, and presentation logistics for the OptiCrop demo day.

Demo Environment Setup

Setting	Details
Primary Machine	Team Lead's laptop Windows 11, Chrome 124, Python 3.11 venv active
Backup Machine	Backend Dev's laptop Ubuntu 22.04, Firefox 125, identical setup
Projection	HDMI classroom projector; 1920x1080 resolution
Network	College Wi-Fi (backup: mobile hotspot pre-configured)
Browser	Chrome 124 full-screen mode, zoom at 125% for visibility
Flask Port	5000 confirmed not in use on demo machine
Pre-loaded page	http://127.0.0.1:5000 open in browser tab before demo starts

Pre-Demo Checklist (T-30 minutes)

Item	Who
Clone latest main branch to demo machine	Backend Dev
Activate virtual environment; run pip install -r requirements.txt	Backend Dev
Run training notebook to confirm model.pkl exists	ML Lead
Start Flask server; verify http://127.0.0.1:5000 loads	Frontend Dev
Run pytest tests/ confirm 17/17 pass	ML Lead
Test Demo 1 (Rice inputs) confirm expected output	Frontend Dev
Test Demo 2 (Coffee inputs) confirm expected output	Frontend Dev
Open slides in second browser tab	Team Lead
Set browser to full-screen (F11); 125% zoom	Team Lead
Connect projector and confirm display output	All
Prepare backup laptop with identical setup	Backend Dev

Fallback Plan

Failure Scenario	Fallback Action
Flask server crash	Switch to backup laptop pre-configured identical setup
Projector failure	Present on laptop screen shared via Zoom screen share
Network failure	Entire app runs offline no internet dependency post-setup
Model load error	Pre-recorded 3-minute demo video as absolute last resort
Team member absent	Each section rehearsed by 2 members any member can cover any segment

Presentation Materials

- " Google Slides deck 12 slides covering problem, solution, tech stack, demo, metrics, roadmap
- " Live Flask application primary demonstration vehicle
- " Pre-recorded backup video 3 min, covers both demo scenarios
- " Printed handout one-page project summary with QR code to GitHub repo
- " GitHub repo public; judges can browse code during Q&A;
